July 24-28, 2008

July 29 Mathematical Art Public Activity Day

CALL FOR PAPERS

The conference will feature presentations of regular, plenary, and short papers, as well as several teacher workshops. The program for the conference is composed from a combination of submitted and invited presentations.

The Conference plans to distribute the refereed Proceedings at the conference. Thus, there is a tight and firm schedule:

Deadline for paper submissions for review: February 1, 2008

Notification of acceptance of paper: March 25, 2008

Deadline for submission of final manuscript: April 25, 2008

All papers must follow the format specified on the Bridges website. Please note that one non-refundable full registration is required for one author of each paper. The author must complete his/her registration by this date.

VISUAL ART EXHIBIT

At the conference, there will be an exhibition room for 2D and 3D mathematical art, ranging from computer graphics to quilts to geometrical sculptures. All submitted artwork will undergo a refereeing process. There is a limit of five submissions per artist. Images of accepted artworks will also be published on the conference CD. The primary intent of the art exhibit is to foster active interaction between exhibiting artists and conference participants. Thus we expect all exhibitors to attend the conference and require them to register once they obtain the notification that their work has been accepted.

THE EXCURSION

The excursion takes the people to several monumental and historical churches built during the middle Ages that also are the exhibit place of artwork of several modern artists from the Netherlands and other European countries. The churches are located in beautiful landscapes surrounding the city of Leeuwarden. The excursion then will continue with a guided tour of the city of Leeuwarden including visits to the National Ceramics Museum Het Prinsessehof (Birth house of M.C. Escher), and Fries museum. The tour ends with the visit of the Leeuwarden City Hall building and a reception in that building.
